

2027
REWEAVE

A black and white photograph of a person's face, partially obscured by a large, bold, red text overlay. The text reads "VISION BEYOND" in a sans-serif font. The person's face is visible in the background, with their eyes looking towards the camera. The overall mood is contemplative and futuristic.

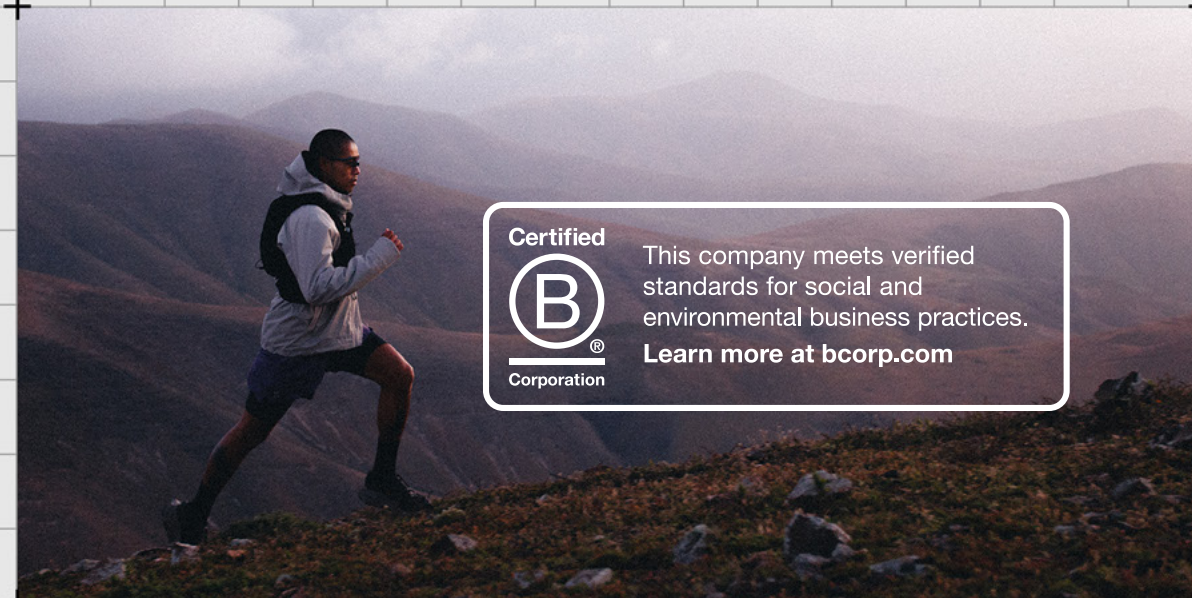

VISION BEYOND

AT BOLLÉ, INNOVATION GOES HAND IN HAND WITH ENVIRONMENTAL RESPONSIBILITY.

WE DESIGN CUTTING-EDGE PRODUCTS USING RENEWABLE OR RECYCLED MATERIALS,
SUCH AS RECYCLED METAL AND PLANT-BASED CASTOR OIL.

AS A LEADER IN ECO-DESIGN, BOLLÉ IS INTRODUCING 6 NEW ECO-DESIGNED SUNGLASSES AND 7 NEW ECO-DESIGNED OPHTHALMIC FRAMES. WITH THE SS27 COLLECTION, ECO-DESIGN* NOW REPRESENTS **93% OF THE TOTAL EYEWEAR RANGE (SUN + OPHTHALMIC)**, ALLOWING BOLLÉ TO **EXCEED ITS 2027 OBJECTIVE.**

ORIGINALLY AIMING FOR 90% OF THE RANGE TO BE ECO-DESIGNED BY 2027, BOLLÉ DEMONSTRATES THROUGH THIS COLLECTION ITS STRONG COMMITMENT TO SUSTAINABILITY AND RESPONSIBLE INNOVATION. THESE EFFORTS HAVE BEEN RECOGNISED THROUGH **THE B CORP™ CERTIFICATION, WHICH MEANS THE COMPANY MEETS VERIFIED STANDARDS FOR SOCIAL AND ENVIRONMENTAL BUSINESS PRACTICES.** FURTHER DETAILS ARE AVAILABLE IN THE COMPANY'S **SUSTAINABLE DEVELOPMENT REPORT.**

PLATINUM

A true reference in the world of eye protection, Bollé Safety offers protective glasses trusted by professional workers in demanding industries like automotive, construction, mining, or pharmaceutical. Platinum represents the highest level of expertise in anti fog and anti scratch protection.

With Phantom, Bollé brings this expertise to everyone. A perfect protection with a more performing anti fog and an anti scratch that last 40% more than the standard.

LIGHTWEIGHT

NXT[™] material is close to the lightest lens material available today, at 14% lighter than polycarbonate. This allows for larger designs with fuller coverage, ultimate protection and utmost comfort.

AVAILABLE IN PRESCRIPTION

Because everyone's vision is unique, Phantom lenses are available on our RX-able frames, suitable for 99% of prescriptions.

HIGH IMPACT RESISTANCE

NXT[™] lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. NXT[™] is one of the strongest materials on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

OPTICAL CLARITY

Made with NXT[™] material, Phantom lenses raise the optical clarity of our lenses to a new level. NXT[™] material is packed with a lot of features such as optimal clarity, lightweight, high impact resistance, chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

PHOTOCHROMIC PERFORMANCE

Phantom lens technology adapts to any light condition, ensuring precise visual acuity whatever the weather. The lens tint changes with the light from cat.0 to cat.3. Enhanced vision whatever the conditions.

HIGH CONTRAST

Bollé has advanced the performance of Phantom lens technology by adding a high contrast filter on its lenses. Available on all Phantom lenses from Cat. 1, the high contrast filter boosts colors and significantly enhance your vision. Whether you are on the road or on trails, high contrast lenses will help you perceive the obstacles.

THE FIRST LENS EVER DEVELOPED WITH ARTIFICIAL INTELLIGENCE.

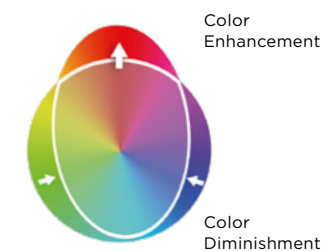

1. Find out which wavelengths to enhance or dampen
2. Design and develop the chemical compounds (pigments) that will absorb the right wavelengths
3. Put together the perfect blend of pigments for the transmission curve we want to achieve

Engineered for high-intensity activities, the SKYRUN is our lightest frame, designed to reduce weight without compromising stability during long efforts. Thermogrip® inserts on the temples and nose provide consistent grip, even during sustained or vigorous movement. The adjustable nose bridge enables a precise fit, ensuring the frame remains correctly positioned as intensity increases. Available with PHANTOM photochromic lenses for controlled adaptation to changing light, or with VOLT High Contrast Enhanced Colour lenses for enhanced contrast and visual precision. Developed and tested with endurance athletes, the SKYRUN meets the demands of sustained performance when efficiency and focus matter most.

Designed for water sports, the WINDCHASER combines a cylindrical half-rim shield construction with technical features built for use in wet and dynamic environments. The vented lens structure supports efficient water evacuation, while the Fin Shield technology provides extended side coverage to reduce exposure to spray. FIT-TEC temples with 3-axis rotation, combined with an adjustable Thermogrip® nose piece, allow precise adjustment and maintain stable positioning during movement. Available with VOLT+ High Contrast Enhanced Colour polarized lenses to enhance contrast and manage glare on water surfaces. Developed and validated with professional skippers, the WINDCHASER is designed to meet the demands of active use on the water.

The DRIFTWOOD is a floatable frame designed for activities near and on the water. Its wraparound 8-base construction provides extended side coverage to reduce peripheral light exposure in bright marine environments. Integrated Air Float Pure technology allows the sunglasses to remain afloat for practical recovery if dropped overboard. Flexible single-material temples, cord attachment perforations and Thermogrip® nose pads maintain consistent grip in wet conditions. Available with Bollé's VOLT+ High Contrast Enhanced Colour polarized lens to improve contrast and manage surface glare. Developed and validated with professional skippers, the DRIFTWOOD is built to meet the demands of real marine use.

Thermogrip® Snap hinge
S-Fit temples
45% bio-based frame (made with renewable castor oil)

Designed for active use in both urban and outdoor environments, the FENIX features Bollé's original wraparound shape for extended coverage and a wide field of view. The 8-base frame structure helps reduce peripheral light exposure while maintaining a stable fit during movement.

Thermogrip® rubber on the temple tips and nose pads provides consistent grip and secure positioning throughout the day. Available with VOLT+ High Contrast Enhanced Colour polarized lenses to enhance contrast and manage glare in bright conditions. Tested and approved by active users, the FENIX is designed to meet the demands of everyday use in varied environments.

The VENERIS is designed specifically for smaller faces and built for active lifestyles, from the city to outdoor environments. Its wraparound 8-base frame delivers extended coverage and a wide field of view while maintaining a sleek, modern silhouette. Thermogrip® rubber along the temples and nose pads ensures lasting comfort and a secure fit throughout the day. Available with Bollé's VOLT+ High Contrast Enhanced Colour polarized lens for enhanced contrast and controlled glare in everyday conditions. Approved by active users who expect stability and coverage when their pace picks up, the VENERIS combines dynamic design with dependable hold in a perfectly proportioned fit.

The NAGA is a flat base lifestyle frame defined by Bollé's iconic wide temples and a bold rectangular bandeau silhouette. Its sharp lines and controlled proportions give the frame a confident edge suited to modern everyday wear. Thermogrip® inserts on the temples and nose pads ensure a secure, stable fit throughout the day. Approved by active users who expect sport-inspired reliability in their daily routine, the NAGA stands out with distinctive style and everyday confidence.

A TRANSPARENT & INTUITIVE WEBSHOP

Since September 2022, a more informative and easier-to-use version of the RX webshop has been made available to opticians, to make the ordering process even smoother. You can enter the prescription details of the frame wearer and the webshop will automatically filter the available frame & lens combinations corresponding to the prescription. A lens thickness calculator also helps you to anticipate the best solution for each wearer.

CARVER ST NAV

NEW

55□16 140

FIT : MEDIUM | BASE : 5 | MATERIAL : MIXED METAL-NYLON FRAME
45% BIO-BASED NYLON, 48% BIO-BASED RUBBER AND 91% RECYCLED STAINLESS STEEL

BV047004

Expanding the CARVER range with a mixed metal-nylon construction, the CARVER ST NAV reinterprets the aviator silhouette with a modern, sport-influenced edge designed for everyday wear. Its self-adjusting straight temples, inspired by ski construction principles, combine an inner flexible rubber, a metal-blade core and an outer rigid rubber layer to deliver enhanced stability and long-lasting comfort.

Adopted by our athletes and ambassadors who wear prescription eyewear, the CARVER ST NAV extends Bollé's technical expertise into everyday vision.

Inspired by sport and designed for everyday wear, the CARVER IT reinterprets the classic rectangular frame with a dynamic yet refined aesthetic, highlighted by a distinctive keyhole bridge. Its self-adjusting straight temples draw inspiration from ski construction, combining an inner flexible rubber, a metal-blade core and an outer rigid rubber layer to deliver enhanced hold and long-lasting comfort. Adopted by our athletes and ambassadors who wear prescription eyewear, the CARVER IT extends Bollé's technical expertise into everyday vision.

CARVER ORIGO NEW

Inspired by sport and designed for everyday wear, the CARVER ORIGO features a clean, modern rectangular silhouette. Its self-adjusting straight temples, drawing on ski construction principles, combine an inner flexible rubber, a metal-blade core and an outer rigid rubber layer to deliver enhanced stability and long-lasting comfort. Adopted by our athletes and ambassadors who wear prescription eyewear, the CARVER ORIGO brings Bollé's technical know-how into everyday vision.
